RE: Phase II On-Site Groundwater Investigation RFI Supplemental Report  
Occidental Chemical Corporation, 6200 S. Ridge Road, Wichita, Kansas  
RCRA ID #KSD007482029

Dear Mr. Somoano:

The U.S. Environmental Protection Agency has reviewed the above referenced document for the Occidental Chemical Corporation Wichita facility received June 20, 2014, which was in response to the EPA comments made on the Phase II Groundwater Investigation RFI Summary Report, dated May 16, 2014. This report generally satisfies the comments EPA made on the summary report, the only caveat being that the EPA in noting the addition of the Exposure pathway analysis, anticipates further discussion with OCC on issues discussed in that section during review of OCC's Human Health Risk Assessment Work Plan currently being prepared.

With the addition of the Supplemental report, the Phase II On-Site Groundwater Investigation RCRA Facility Investigation is substantially complete; yet lacking Section 6.2's proposed monitoring well installation/data collection, as discussed with Bruce Clegg on August 29, 2014. Please proceed with the proposal in Section 6.2 of the report, after which Occidental needs to provide the EPA a Final RFI Compilation Report. If you have questions about this letter, please contact me by phone at (913) 551-7279 or by email at [Roberts.Bradley@epa.gov](mailto:Roberts.Bradley@epa.gov).

Sincerely,

Brad Roberts  
Environmental Scientist  
Waste Remediation and Permitting Branch
